22. (Original) A method according to claim 21 and wherein said second providing comprises activating a staff resolution component of said workflow system to determine said actors for said current workflow.

23. (Previously Amended) A method according to claim ~~24~~ 22 and wherein said activating comprises selecting a portion of said actors according to a current work item to be performed.

24 – 33. (Cancelled)

34. (Previously Presented) The method according to claim 14 and wherein said providing comprises providing a support interface per support application, wherein said support application supports said performing of said work of said selected workflow.

35. (Previously Presented) The method according to claim 14 and wherein each said interface includes a portlet.

36. (Previously Presented) The method according to claim 34 and wherein said support interface includes a portlet.

37. (Currently Amended) A method implementable by a computer comprising:

in ~~one~~ a same screen of the computer, providing both an interface to a workflow system for performing a selected workflow and an interface to a collaboration system within which any actor of a current instance of a selected workflow can collaborate with any other actor of said instance;  
within said workflow system, enabling said actors to be defined; and  
providing a list of said actors of a current instance of a selected workflow to  
said collaboration system.

38. (Cancelled)

39. (Previously Presented) A method according to claim 37 and wherein said actors comprise at least one of the following: workflow actors and external actors.

40. (Previously Presented) A method according to claim 37 and also comprising notifying at least one workflow actor that a work item is waiting for him/her to act upon.

41. (Previously Presented) A method according to claim 40 and wherein said notifying comprises producing a hyperlink to said awaiting work item.
42. (Previously Presented) A method according to claim 37 and also comprising accumulating correspondences of said actors when performing said current instance of said selected workflow.
43. (Previously Presented) A method according to claim 42 and wherein said accumulating comprises sending a hyperlink to a location where a workflow actor may process a work item.
44. (Previously Presented) A method according to claim 42 and wherein said accumulating comprises transferring control of a work item from a first workflow actor to a second workflow actor.
45. (Previously Presented) A method according to claim 37 and wherein said providing comprises activating a staff resolution component of said workflow system to determine said actors for said current workflow.
- ~~45~~ 46. (Currently Amended) A method according to claim 44 and wherein said activating comprises selecting a portion of said actors according to a current work item to be performed.
47. (New) A method according to claim 14 and also comprising  
    receiving data of said current instance and a list of current actors from said  
    workflow system; and  
    providing said list to said collaboration system.
